

Stay Ahead of the Future

With Censis® Technologies, the
leader in sterile processing and
perioperative efficiency

The Censis[®] Difference

Improving perioperative efficiency is our focus

At Censis, we focus on four advantages to guarantee your success

Delivering Innovation

Continuous technological investment and customer insight drive our best-in-class systems to optimize sterile processing, perioperative efficiency, and compliance.

Implementation Tailored to You

Our partnership starts with working shoulder-to-shoulder with you to provide system training, data services, and clinical education.

Ensuring Your Investment in the Future

Customized business reviews are delivered by your dedicated client manager, providing in-depth understanding to maximize your system's operational efficiencies, savings, and ROI.

Clinically-Based Service, Training, and Support

Centered on clinical and regulatory guidelines, we provide clinical assessments, hands-on training, and ongoing educational support to help keep you compliant and a step ahead of the ever-changing clinical and regulatory environment of healthcare.

What We Do:

Solutions for Hospitals Ambulatory Surgery Centers, Endoscopy Centers, and Clinics

CensiTrac™

CensiTrac® puts you in full control of your surgical inventory by empowering your team to track to the instrument level through the industry's most capable and comprehensive surgical inventory management system. Censis' OR Scheduler Interface provides real-time tracking to surgical cases and captures all sterilization records required for accreditation and infection prevention purposes. Built to be integrated directly into your existing department ecosystem, CensiTrac puts automation at the forefront of your department.

CensiMark™

CensiMark® is the industry's most extensive asset marking service offering laser, electrochemical, and other marking services to keep you in complete control of your surgical inventory, and empowering you to track to the instrument-level.

LoanerLink™

LoanerLink® in conjunction with Censis' OR Scheduler Interface communicates with your system and vendors, providing real-time knowledge of scheduled procedures—including the number and arrival time of sets—streamlining your loaner management process.

ScopeTrac™ Advanced

ScopeTrac® Advanced manages every endoscope and its accessories through the entire procedural cycle—from bedside to storage. It offers guided workflows, quick IFU access, and comprehensive data and reporting capabilities. This allows you to eliminate manual documentation, manage competency requirements, optimize workflows, and improve inventory management.

1,300+

Hospitals have benefited
from our solutions

70M+

Sterilization cycles
captured

20M+

Surgical cases
tracked

Trust the Numbers

Step Confidently Into the Future with Unrivalled Clinical and Professional Services
